

UK **Inspection**
Systems

The one-stop shop for all your Metal Detection, Check weighing, X-ray Inspection and Weighing Scale needs!

Utilising one company to support your inspection equipment needs will streamline processes and increase quality of your production processes, supported by our expert engineers having 100+ years of combined expertise of food industry knowledge.

Our multitude of products and services offer enormous time and cost saving benefits, helping to avoid inflated OEM pricing and longer lead-times. Prompt fulfilment and specialist engineer fitment and support available.

UKIS hold extensive current, and many obsolete, manufacturer items for your convenience.

Machine Solutions:

- Metal Detectors: conveyor based, pipeline, freefall.
- Checkweighers: static, dynamic, multi-head.
- Combination Systems: metal detector/checkweigher, x-ray/checkweigher, twin-head combinations.
- X-ray Inspection: single energy, dual energy, large format (multi-contaminant, multi-quality check).

Weighing Scales:

- **Bench:** checkweighing, counting, batching, precision.
- **Floor/Platform:** low-profile, pit, lift, portable.
- **Applications:** weigh-price labelling, vessel, silo.
- **Moisture Analyser:** halogen, infrared, carbon fibre.

Test Pieces & Weights:

- A variety of material contaminant and sized test pieces purchasable for next day delivery. Certificates provided free of charge.
- Suitable for many foreign body detection applications such as conveyor based, freefall, gravity, pipeline, bagged and x-ray and checkweighers.
- Checkweigher and Scale test weights, fashioned to your line requirements and tolerances.
- Custom engineer kits available, bespoke to your needs supplied with a carrying case.

Spare Parts:

- Fabrication capabilities for replacing components that are unobtainable due to obsolescence, conveyor belts, rollers, decking support and railings, bearings, bearing housings, pulley sprockets and safety covers.
- Assessment and refurbishment can be coordinated with our specialist workshop, guaranteeing proper fit and function.
- Depend on specialist knowledge and take charge of your machinery, investing in the future to enhance productivity. Genuine spares packages can be offered to avoid extensive lead times and accomplish repairs in a well-timed fashion.
