RENATUS CHECKWEIGHER

Designed for Food & Packaging Industries

The Renatus checkweigher offers a re-birth to the legacy Cintex checkweigher (such as the CS4000) and maintains the rugged, reliable stainless steel mechanical chassis and weigh table in service. However, its original electronics suffer from discontinued manufacturer support, component drift, and manual logging limitations. Upgrading the electronic controls and fail-safes modernises the system to satisfy current retail compliance standards, in addition to extended the system life.

Features include:

- Designed and built in the UK
- Modern Electronic Controls
- Multilevel password protection
- Upgradable to full Supermarket Compliance Specifications
- 10" colour monitor and touchscreen user interface
- 16 Configurable inputs/outputs
- Enhanced USB security key option
- Statistical Data Collection via USB or Network

Utilising the existing legacy base system, the Renatus control system upgrade future proofs from further obsolescence.

The fitting of modern control electronics together with a new touch screen user interface means the existing checkweigher can be up-cycled into a supportable asset for a much lower cost compared to a new replacement.

During the upgrade process, missing and/or further fail-safes can be installed to meet with the latest retail codes of practice, in addition to levels of refurbishment and mechanical running gear servicing of the transportation conveyors.

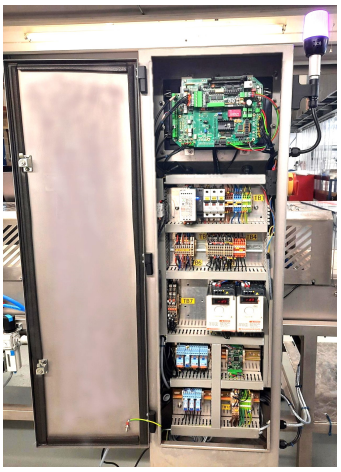

The touchscreen user interface offers a powerful modern controller to configure machine settings and specific jobs with ease, and can be linked to statistical data capture software, our **CWRecorder** solution, to enable extraction of valuable information into audit log files for future review and compliance purposes.

RENATUS CHECKWEIGHER

Specification

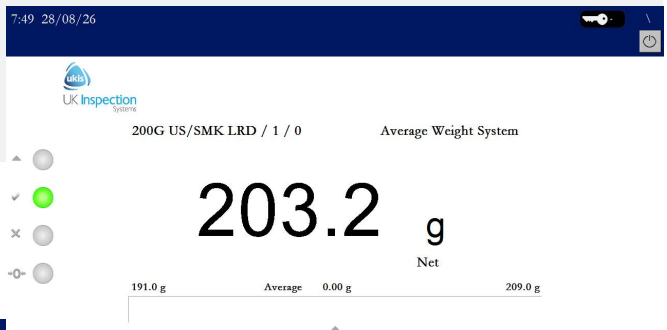

Weight capacity:	as legacy system
Weight range:	as legacy system
Belt speed:	20 to 60m/min (variable)
Min weight conveyor:	as legacy system
Max weight conveyor:	as legacy system
Height:	as legacy system
Length:	as legacy system
Width:	as legacy system
Belt type:	as legacy system
Belt width:	as legacy system
Failsafe	Full retail compliance config
Reject:	Air blast or pusher
Electrical:	220-240V single phase 16 Amp 50-60Hz
Warranty:	1 year (control electronics)

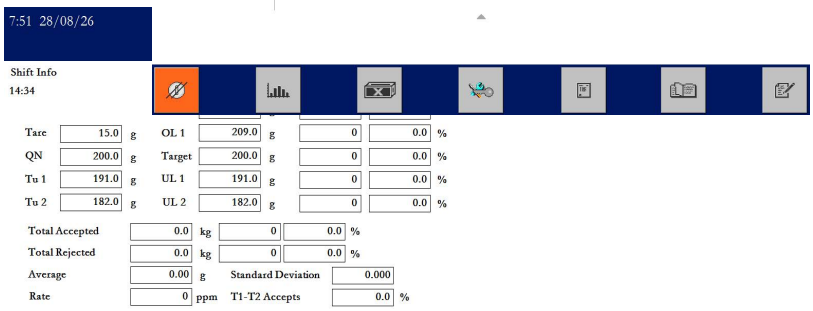

Applications

- Bakery
- Cereal
- Confectionery
- Dairy
- Fish
- Packaged Products
- Fruit & Vegetables
- Meat & Poultry
- Nuts & Grains
- Snack Foods
- Dried Fruits

Options

- Enhanced USB Security
- Remote Data Collection
- Spares Kit
- Retail Fail-safes
- Full or Partial refurbishment
- Full or Partial mechanical service
